My Objectives

Formulate the objectives and plans for language learning: the pages can be organised individually.
What do I want to learn? How do I want to learn?
Why do I want to learn a language, what do I need to be able to do in it, and how would I like to go about it? Am I learning the language for my job, for travel, or for study? Is it more important for me to understand, to read literature or to write? Do I want to attend a course, learn in a tandem partnership, or have a stay in a foreign language area?
